STIX System

WHEN LIGHT MEETS EMOTIONS

A photograph of a textured, light-colored wall. At the top, there is a series of vertical, rectangular light slats. Below these slats, the word "unonovesette" is mounted in large, three-dimensional, light-colored letters. The lighting creates a warm, golden glow, with the light from the slats illuminating the wall and casting long, soft shadows from the letters below. The overall effect is one of modern, minimalist design.

STIX System

_Architectural functionality and decorative expressiveness.

Stix System, designed by Juliette van Putten, is a modular outdoor lighting system that combines technological innovation with refined minimalism. Available in five lengths, with various mounting options, three lighting types, and a carefully selected range of finishes,

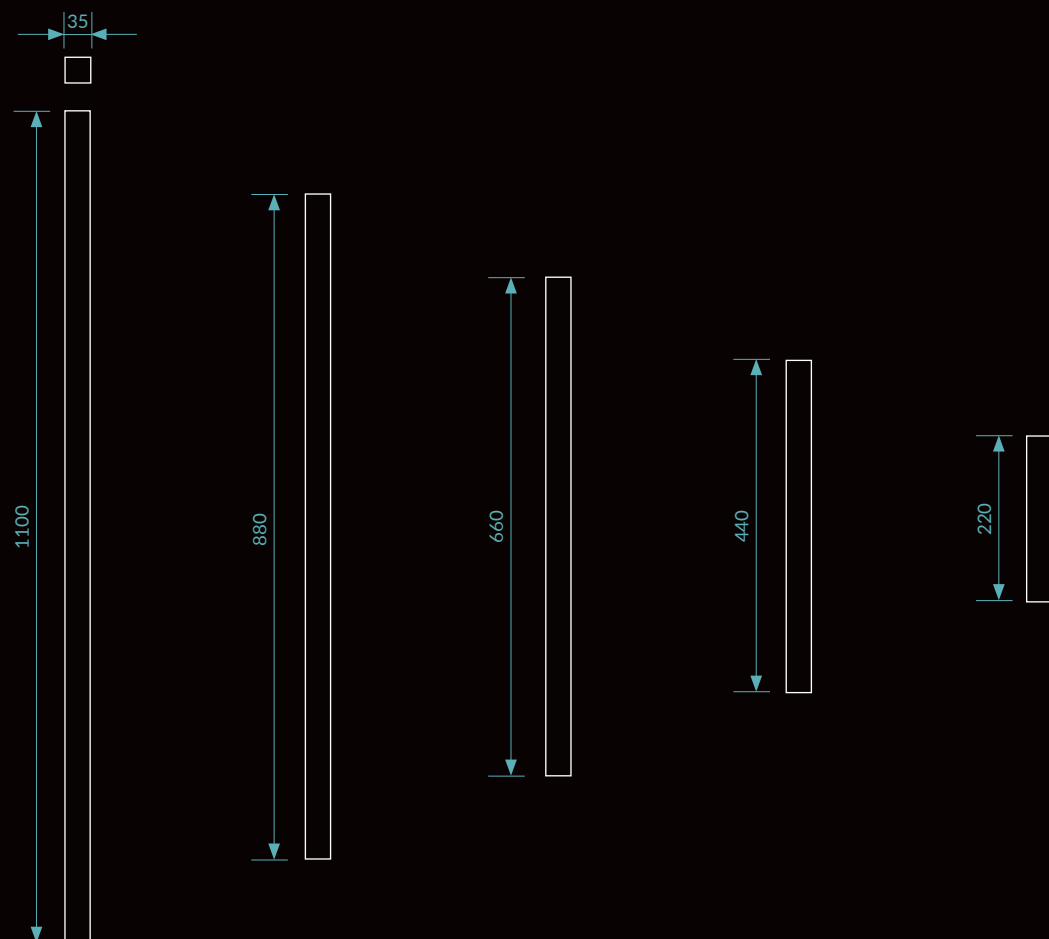

it offers designers complete creative freedom. The exceptional light quality merges with a timeless design, adaptable to any style. A system that combines architectural functionality and decorative expressiveness, thanks to its multiple solutions. A single stylistic solution to shape projects where consistency, versatility, and quality are essential features.

_Funzionalità architettonica ed espressività decorativa.

Stix System, progettato da Juliette van Putten, è un sistema modulare per l'illuminazione outdoor che unisce innovazione tecnologica ed essenzialità sofisticata. Con cinque lunghezze, diversi punti di fissaggio, tre tipologie di illuminazione e una selezionata

gamma di finiture, offre ai progettisti un'estrema libertà compositiva. La qualità della luce si fonde con un design senza tempo, trasversale a ogni stile. Un sistema che coniuga, grazie alle sue molteplici soluzioni, funzionalità architettonica ed espressività decorativa. Un'unica soluzione stilistica per dare forma a progetti in cui coerenza, versatilità e qualità sono caratteristiche imprescindibili.

_Freedom of composition

Stix System is made up of both individual elements in various sizes and a series of predefined compositions. The elements can be single or double emission, and in the Glow version, they feature a diffuser that enhances their aesthetic appeal, while providing a more even light distribution. The basic configurations, in addition to being used individually, can also serve as the foundation for developing larger, varied solutions, creating dynamic and unique compositions.

_Libertà compositiva

Stix System è composto sia da singoli elementi nelle varie misure che da una serie di composizioni predefinite. Gli elementi possono essere a emissione singola o doppia e, nella versione Glow, sono dotati di un diffusore che arricchisce esteticamente la loro forma, oltre a garantire un'illuminazione più uniforme. Le configurazioni di base, oltre a poter essere utilizzate singolarmente, possono anche essere il punto di partenza per sviluppare soluzioni più ampie e variegata, dando vita a composizioni dinamiche e sempre uniche.

_ Vision and Expertise

The Stix System amplifies its design freedom and opens up to a variety of aesthetics, relying on a carefully selected palette of colours and finishes developed by unonovesette, crafted with meticulous attention and in tune with the latest trends in architecture and interior design. From the contemporary character of matte black and Brushed moon, to the uniqueness of Flamed bronze and the elegance of Dune, all the way to the exclusive tones of the Colour Trends collection: Stix interprets every design vision with style.

unonovesette's attention to project, technological, and production quality is also reflected in the choice of trusted partners, especially for finishes and colourations, with suppliers operating within the Made in Italy design world. Thanks to their sensitivity and expertise, they ensure the highest quality craftsmanship.

_ Visione e Competenza

Il sistema Stix amplifica la sua libertà progettuale e si apre a diverse estetiche, attingendo a una palette di colori e finiture accuratamente selezionata da unonovesette, studiata con estrema attenzione, in sintonia con i trend dell'architettura e dell'interior design. Dal carattere contemporaneo del nero opaco e del Brushed moon, all'unicità del Flamed bronze e all'eleganza di Dune, fino alle tonalità esclusive della collezione Colour Trends: Stix System interpreta con stile ogni visione progettuale.

L'attenzione alla qualità progettuale, tecnologica e produttiva di unonovesette si riflette anche nella selezione di partner di assoluta affidabilità, anche per quanto riguarda le finiture e le colorazioni, con fornitori che operano nel mondo del design Made in Italy e che, grazie alla loro sensibilità e competenza, garantiscono lavorazioni di alta qualità.
